Important

Subject: **Pilot run of Predictive Score of Students for Classes VI to XII for Strengthening Assessment Practices- reg.**

Madam/Sir,

Assessment is an integral part of the teaching-learning process and should not merely be treated as a tool for awarding marks or grades. It plays a significant role in identifying the present status of learning and learning needs of students, providing timely feedback, and guiding suitable academic interventions for continuous improvement. Effective assessment practices help teachers understand the progress of students and support them in achieving the desired learning outcomes.

2. In this context, it is essential that teachers establish continuous and meaningful communication with students. Mutual interaction and academic mentoring create confidence among students and encourage them to express their learning difficulties, conceptual gaps, and areas where they require additional support. A supportive classroom environment motivates students to explore their potential and participate actively in the learning process without fear or hesitation.

3. It is also observed that a teacher who understands the learning level, behaviour, aptitude, and academic progress of students thoroughly is generally able to anticipate the likely performance of students in the forthcoming examinations or academic session. Therefore, teachers may be encouraged to assess the potential of every student on the basis of classroom performance, previous year results, periodic assessments, and their professional experience.

4. As a pilot initiative, each Deputy Commissioner shall identify and nominate four (04) Kendriya Vidyalayas from his/her Region for implementation of the Predictive Score of Students project. The selected Kendriya Vidyalayas shall ensure preparation and submission of Predictive Academic Scores of **all students of Classes VI to XII** on the SAMAGAM Portal prior to the conduct of the PT-1 Examination. After the declaration of the PT-1 results, the predictive scores shall be compared with the actual performance of the students, and the reasons for deviation shall be ascertained.

5. Accordingly, subject teachers may prepare a **Predictive Academic Score** for each student **in the beginning of first quarter** and **on the basis of performance in previous class** for the current academic year and the predictive score shall be submitted on

[Signature]
14/7/26

SAMAGAM portal. Subsequently, the predictive score shall be reviewed after every forthcoming assessment/examination (as per **Annexure-I**), including PT-1, Half Yearly Examination, PT-2, PT-3, Session Ending Examination, and Pre-Board Examination, indicating the revised expected level of achievement and academic progress of the student. The predictive score is intended to serve as an **internal academic monitoring tool** for teachers and schools to track students' progress and plan appropriate academic interventions. After each examination, **teachers may review the gap, and if need be, revise predictive score on SAMAGAM portal** and analyse whether the predictive targets have been achieved and take necessary remedial measures wherever required. Special emphasis may also be given to ensuring that no student falls below the baseline pass percentage/achievement level attained in the previous examination, so that continuous and progressive improvement in students' learning outcomes may be ensured. It is expected that successively predictive scores shall get closer to actual achievement of student and it will also drive student and teacher to better performance. **It is advised that this predictive score shall not be communicated to the students and parents.** The final score in the subject shall be compared with last revised predictive score to assess the deviation.

6. Principals may also be advised to periodically monitor the progress of students against the predictive targets set by teachers and encourage teachers to maintain systematic student progress records along with appropriate action plans for continuous academic improvement.

7. It is requested to disseminate the above directions to selected four Kendriya Vidyalayas as per para 4 above and ensure expected follow up work meticulously.

This issues with the approval of the competent authority.

(Somit Shrivastav)

Joint Commissioner (Acad.)
